

NAM 'Guisarme' Joint Autonomous Weapons Project

The Guisarme Project is a joint engineering and design endeavor by several [NAM](#) divisions, namely Aerotech, Savtech, and Terratech, to produce autonomous platforms that will be of use to all Nepleslian citizens, but especially to inflate the combat potency of [SMoDioN](#) Forces against the [NMX](#) offensive. Suggested by Adrian Roberts in [YE 33](#), the project would help free up standing garrisons for critical deployment and allow a disproportional extension of military force for a counteroffensive or reclamation effort.

Products

Autonomous Navy

- [NAM-SW-E230-X 'Sand Lane' Semi-Autonomous Disposable Lasing Node](#)
- [NAM-SW-E227-X 'Sand Lane, M' Semi-Autonomous Disposable Lasing Node, Miniature](#)

Autonomous Army

- [NAM-NTD-R07-X 'Gendarme' Networked Tactical Deployment Robot](#)
 - [NAM-E10-7 Training Marker & NAM-Ar10-7 Plate](#)

Autonomous Soldier

- [NAM Savtech Cliffhanger Autonomous Learning Operator](#)
