

NovaCorp Xaser Pistol

Overview

An even more effective weapon than the [NovaCorp Xaser Assault Rifle \(XAR\)](#), arguably and like it designed by [NovaCorp](#). It certainly does more damage, though its long grip guard and weight are pretty clunky for a pistol. These pistols make good competition pistols, believe it or not, as their weight helps steady the hand some. Spendy for a pistol, though. Changeable colored panels.

Stats

Type: X-ray laser Class: Pistol **Sub-class:** (Compact pistol) **Model:** Xaser Pistol **Sub-model:** Xaser Compact Pistol, Xaser Burst Pistol **Dimensions:** 224(174) x 93 x 30 mm Mass: 2,000 g Rate of Fire: Semi-automatic or 5-round burst Range: 40 m **Energy ratings:** Slightly more severe than the rifle. X-ray blasts damage only organic targets, while inorganic barriers are useless unless properly shielded. "Heavy" blasts tend to explode, but not like NSP shots. **DR:** 5.

Capacity: 50 through BU-P30R in grip. 25 heavy shots.

Controls: Two switches on right side adjust built-in laser and light. Left side features knob to adjust between low, normal and heavy. Light display on right side. Safety above trigger. Battery removal button on right side.

Additions: Night sights.
