

Gekido variations

This page is a page dedicated to post partial variations to the [OI-M3-1A Gekido](#). These variations are acutal alterations to the frame itself. Different accessories that are modular or removable without a total overhaul should not be listed.

Gekido Extend

The Gekido extend is a minor variation to the [OI-M3-1A Gekido](#) in which the back has been redesigned to allow for a modular hard point system. This has lowered it's standard maneuverability due to the removal of the back mounted thrusters. A leg mounted thruster system was added and the alignment thrusters along the body have been strengthened to allow it to still fly. The 'Gekido Extend' is always a two seater unit as well.

Changes

Speeds

Ground speed (Hover): 190 KPH **Air speed:** Mach 3.2 **Zero Atmosphere:** .200c

Modular Hard points

Hard points for back mounted units have been added

Other

Crew: Always uses 2 seater cockpit
