

Itsavan

The Itsavan, is, well, a Van. Its primary purpose is the transportation of people and cargo. It is manufactured by **Origin Motors Corporation**, a branch of [Origin Industries](#), starting in [YE 34](#).

Features

- Reliable
- Automatic transmission
- [Durandium Alloy](#) construction
- Windshield wipers
- Rear and side view mirrors
- three-point safety harnesses
- Independent suspension
 - Smoother ride
 - Increased handling

Price

- **Fusion:** 4,000KS

The Itsavan is available in any color one can name or provide a sample for, at no extra cost. Specific color schemes and patterns may also be requested, but may carry an extra charge (around 50-150 KS depending on the complexity)

Appearance

The Itsavan is, in a word, ugly. Shaped roughly like a boxy bean, it has an awkwardly sloped front end, combined with a rear end that looks like the designer sneezed when working on the profile. The rear end contains a windowed hatch, and indeed, nearly every side is covered completely with windows. The roof has been hideously upholstered, and the van is, overall, extremely homely.

Details

- Nomenclature: OI-K7-1A
- Name: Itsavan
- Type: minivan
- Manufacturer: [Origin Motors Corporation](#)
- Year: [YE 34](#)

The Itsavan is a basic, if ugly, front-wheel-drive minivan. It sports a driver's seat, three captain's chairs for passengers, and a three-passenger bench in the rear. All the passenger seats can be folded to increase cargo capacity, or they can be removed to increase it even further, or to use the van as a cargo van. It is constructed of light [Durandium Alloy](#) with transparent Durandium windows, making it fairly tough for its size. Safety systems include a radio that can be used to call for help, and standard three-point safety belts, as well as traction control, anti-lock brakes, and several air bags.

Capabilities

Top speed: 95 MPH **Range:** Limited to land **Crew:** 1 Driver, 6 passengers. **climb/descent:** 40% grade

Dimensions

Mass: 1 ton Length: 3.5 meters Height: 2.3 meters Width: 2.0 meters

Systems

Power

- **Fusion:** The Fusion powered version of the Itsavan is actually an electric powered vehicle, with a [HONEY Burst](#) in place of a battery or fuel cell. The Burst's fuel tank can power the van for roughly 10,000 miles before needing replenishment.

Wheels

The tires are made of Silicone rubber with Durandium belting for strength. The wheels these tires are mounted to are made of polished Durandium.

Suspension

The Itsavan uses independent suspension, which gives it a very smooth, comfortable ride, and helps the vehicle around corners. Independent suspension reduces body roll and helps to keep the tires planted firmly on the ground, making the Itsavan more efficient than a vehicle with solid axles.

Communications

The Itsavan contains a radio system which allows the user to hear any public channel. It also has a handset which allows them to call for help, or communicate with nearby people.

Storage

The Itsavan has a rear storage area which can store roughly 10 cubic feet of cargo. If the rear seats are all folded down, the Itsavan can store roughly 100 cubic feet of cargo.
