

Origin Scientific Ventures

Founded in [YE 45](#), OSV is one of [Origin's](#) branch companies.

About

Origin Scientific Ventures, or OSV, is a service oriented company, which, while it does produce its own scientific and measurement devices, does not sell them, but rather sells the scientific, laboratory, and testing services. Originally a collection of in-house teams working for individual branches of [Origin Industries](#), OSV is a consolidation of several smaller groups that have been brought together for resource sharing, oversight, and inter-operability. These smaller teams or labs can provide services both to origin, as well as to any interested groups outside of Origin, to include militaries and civilian companies.

Services

OSV has numerous groups and teams, each with a different focus. Some notable teams or groups are listed below.
