A model with Handguard

B model without handguard

Discharge Information

Information on what the SLP shoots, and how it works.

Firing Mechanism

Upon pulling the trigger, energy is drawn from the battery and focused through a series of lenses to produce a Laser Pulse. Stun mode, instead of activating a laser pulse, activates an Electromagnetic pulse, which has a much shorter range.

Ammunition Description

- **Power:** Tier 1, Light Anti-Personnel
- Effective Range 200 meters Semi-auto/auto, 50 Stun
- Maximum Range: 200 meters Semi-Auto/auto, 50 Stun
- Muzzle Velocity: 1C
- Muzzle Blast: A green laser pulse in laser mode, a blue flash for stun mode
- Firing Mode: Semi-automatic, Automatic, 5 round burst, stun
- Recoil: Little to none
- **Battery:** 50-charge pistol battery housed in grip

Weapon Mechanisms

- **Safety:** button below the rear gun sights on the left
- **Fire Mode Selector:** auto/semi-auto/ 5-round burst/stun switch on the left side of the gun

- **Weapon Sight:** manual sights on top of the gun
- **Attachment Hard Points:** Under-barrel accessory rail
- **Battery:** The Battery is removed by pressing buttons on either side of the grip, which releases the battery and allows it to drop free and be quickly replaced.
- **Ammo Display:** the back panel of the gun has a light sensitive display that displays the number of shots remaining in the battery. It changes brightness depending on the light level, getting brighter in the light, and dimming in the dark.
