Phantasm Foods is an NPC Corporation to help create a foundation layer to the economical system of SARP and is part of the Economical Restoration Project made by [Rawolfe](#). The idea is that these corporations are not bought up or taken over but play an essential role in the background for the faction and they can be used to create new products into the faction with the approval of the respective FM. This will put a halt to the idea that one corporation creates all products.
