

Hybrid

Hybrids are a byproduct of Psychopomp's [Artificial Body](#) program. They make use of the companies [Gene Manipulation](#) and Artificial Body services to create custom made bodies for clients that can withstand the most extreme of conditions and can survive off of anything

History

Hybrids are a species created through [Psychopomp's Artificial Body](#) program. Hybrids are ABs that have made use of multiple [species](#) DNA to be made. Hybrids have limitless combinations. Hybrids came into existence in YE 39. Hybrids were created to be ideal soldiers for Psychopomp's PMC branch as they can be made to get through the toughest of climates.

Physiology

The Hybrids' Physiology varies from case to case but all tend to look more towards the human side since human DNA is used as a base for all bodies. Also another aspect to note is that a Hybrid can be custom made to fit almost any preference that the client requests. On average a Hybrid will be around 6' 6" and weigh around 250 lbs for males and females will average around 6' 2" and weigh around 200 lbs.

Immune System

A Hybrid's immune system is heightened to the point that any preexisting disease struggles greatly to affect the body and the immune system will quickly adapt to any newly introduced or developed disease. The rapidly adapting system can lead to complications under certain circumstances as it can become overloaded and cause the Hybrid to enter a state of unconsciousness or in extreme cases death.

Diet

All Hybrids have a wide diet. A Hybrid can eat anything so long as they can chew it. Anything from a burger to highly poisonous plants to bones. Though normally their diet is the same as that of a [Nepleslian](#) diet due to them using human DNA as a base. The Hybrids can digest these possibly deadly meals due to their increased immune system and an enhancement to their digestive systems. This makes it impossible for the Hybrids to be poisoned through consumed items.

Environment

Hybrids can survive in the toughest environments being able to live in areas that are near subzero

temperatures and in extremely high heat. Hybrids have tough skin, enhanced vision, and can go longer periods without food (3 months) or water (a month).

Life Cycle

A Hybrid's life span is usually around 120 years but the maximum that they can live is 250.

OOO Notes

[Ace](#) created this article on 2017/03/29 11:20. It was approved by Ametheliana on April 16, 2017:[Approval Thread](#)

Hybrids can use the same process as the [Alien Species Generator](#) if wanted.
