6 Gauge 4 Inch Ultramagnum is a ultra-heavy shotgun cartridge developed by [Rokheus & Surma Equipment and Logistics Support](#) in various projectile systems to offer users an exceptional combination of versatility and unquestioned raw firepower.

## Performance

Performance with the 6 Gauge Ultramagnum depends on the preferred type of projectile for the user.

In general, the wide diameter of the shell and its long overall length not only allows for an extremely large payload to be delivered, but also allows for increased velocities to magnify the payload's lethality.
