

Sitanin Zbrojovka Model 79

A pistol designed by Sitanin Uusushi and his wife, Yuko Langrova, for [Sitanin Zbrojovka \(SiZi\)](#) on [Democratic Imperium of Nepleslia](#). The pistol, still manufactured in limited numbers, comes in four models: the original Prototypical or “P” version (no longer produced), the P2 “Production”/M “Military”, the PD “Police” and the Y “Yamatai” model.

3/4 View

Model 79 PD "Police"

All steel construction, blued. Plastic grips. Spur hammer (P). Slide release above trigger, left side. Slide extends up around "gutter" sight to add more grip. Dual cams lock barrel in place (P); barrel unlinked during recoil then locked upon chambering. Frame envelopes slide rails. Barrel protrudes 2 mm from slide. No front sight. Equipment rail found on "Production" (P2) model. Traditional sights and combat knob hammer on the "Military" (M) and "Police" (PD).

About the Model 79

Created for “Nepleslian citizenry,” the Model 79 is a relatively cheap weapon firing powerful yet commonly found cartridge. An extra slide, two magazines and barrel originally came in the 70 KS package to convert it to 9 mm; the package now costs 60 KS and works with the P2 and PD. A very accurate gun, competition shooters reported between 1 and 1.5 minute-of-angle groups at 100 meters using the “P” version” out of the box. The P2 and M models are just as accurate, with the final “PD” model repeatedly scoring 1 MOA.

The least common version is the “PD” version, more commonly called the “Police.” The model features a decocker only instead of a safety/decocker. It has a serrated trigger blade and front grip, and uses traditional sights with a “figure 8” configuration.

In [YE 33](#) a new Export (Y) model was created, for export to Yamatai and other places. The gun was modified by increasing the size of the front end to reduce perceived recoil and make the gun sturdier, as well as adding more traditional iron sights, and enlarging the hammer to deal with some heavier military primers. The (Y) model is imported by [Origin Industries](#), but made by SiZi.

Technical data

Name: SiZi Model 79 **Models:** Prototypical, Production, Military Type: Semi-automatic, short-recoil, locked-breech pistol (cartridges) **Length (whole;barrel):** 200 mm;135 mm Mass: 1,025 (M) to 950 (P, P2, PD) g unloaded

Caliber: [10 x 25 mm Ketsurui Zaibatsu Zen Arms .357 SMG \(9 x 22\)](#)

Damage ratings:

- [DRv2](#) Personnel 2
- [DRv3](#) Tier 1

Capacity: 16 cartridges in detachable box magazines **Trigger pull:** 3.175 (P), 6 (P2), 5.5 (M) and 8 (PD) kg double-action, 0.6 (P) and 2 kg (P2, M, PD) single-action **Sights:** “Gutter” integral rear sight w/red dot, adjustable for windage/elevation (P); Three-dot system with dovetailed rear sight and pinned fiberoptic ramp (white) (M); figure-8 sights (P2, PD) **Safeties:** Ambidextrous decocker on rear of slide, pressure sensor in trigger disengages firing pin safety (P); ambidextrous manual safety, firing pin block safety (P2, M); ambidextrous decocker only (PD) **Action:** Double-action/Single-action

(E)ffective, (o)ptimum and ma(x)imum ranges: ~50m E, 30-35m O, 105m X **Perceived recoil:** Larger shooters with bigger hands felt little recoil. Average shooters with average hands felt little recoil. Smaller shooters with smaller hands felt moderate recoil. Muzzle Blast: About a 1.5-inch darker orange-colored circle. **Field strip procedure:** Pull slide back 6 mm. Use magazine to push right side of slide catch. Pull out slide catch. Push slide forward.

Suggested price: 188 KS + 70 KS conversion to 9 mm **Used price:** 140 KS **Magazines:** 25 KS (10 mm), 30 KS (9 mm) **Wooden grips:** 30 KS **9 mm barrel:** 30 KS **9 mm slide:** 50 KS
