

Styrling Ripshot

With the rise of violent crime caused by often drug-induced criminals, Styrling found it appropriate to deliver a weapon unto law enforcement, military and civilian individuals who require the ultimate in self defense. After all, will kind words calm down the rioting mob outside your house? No, but the damaging hollowpoint rounds from the Styrling Ripshot sure will.

Weapon Specifications

Nomenclature Information

Designer: John Skwigleff Manufacturer: [Styrling Vervaardiging](#) Name: Styrling Ripshot (Sv-SPDW-01a)
Type: Submachine Gun Role: Personal Defense Weapon Length: 25.3 inches **Barrel Length:** 8.9 inches
Mass: 5.12 lbs **ROF:** 800 RPM.

Appearance

Discharge Information

Projection/ammo type: 9mm Styrling

Firing Mechanism

Roller-Delayed Blowback

In roller-delayed blowback the barrel is fixed and does not recoil. As the bolt head is driven rearward, rollers on the sides of the bolt are driven inward against a tapered bolt carrier extension. This forces the bolt carrier rearward at a much greater velocity and slows movement of the bolt. The primary advantage

of roller-delayed blowback is the simplicity of the design compared to gas or recoil operation.

Ammunition Description

Caliber: 9mm Stirling Effective Range 130 Meters Maximum Range: 250 Meters Muzzle Velocity: 1210 (FPS) Muzzle Blast: Small muzzle flash. Firing Mode: Single, Auto Recoil: Low (Single, bursts) Moderate (Full-auto).

9MM Stirling

Visual Description: Brass casing with a hollow-point shell. **Ammo:** 30 per magazine, 1 in chamber
Damage Rating: Tier 1, Light Anti-Personnel-2. Damage Description: Hollow-points enter the body and expand, causing further damage to internal organs.

Weapon Mechanisms
