

Hoverboard Board Decals

Special Hoverboard designs which began in late [YE 44](#) to early [YE 45](#) designed by [Yugumo Corporation](#) to assist [Motoyoshi-Igarashi Yue](#)

About The Decals

[Hoverboards](#) like their mundane [low-tech](#) [cousins](#) are made roughly the same way each time they are made. So differentiating between which is owned by whom, decals or designs were created. Of course, due to the technology that causes the Hoverboards to hover, and because of environmental effects, these designs are usually underneath the transparent laminate to protect them from harm.

History

After Yue first designed and created the Hoverboards, she and her aunt [Katsuko](#) later took them for a spin in a prompt race that also served as a demonstration of the new Hoverboards. Realizing that the need to tell the boards apart, she got ideas for designs from her [close family members](#), and had the new boards made to their design in mind.

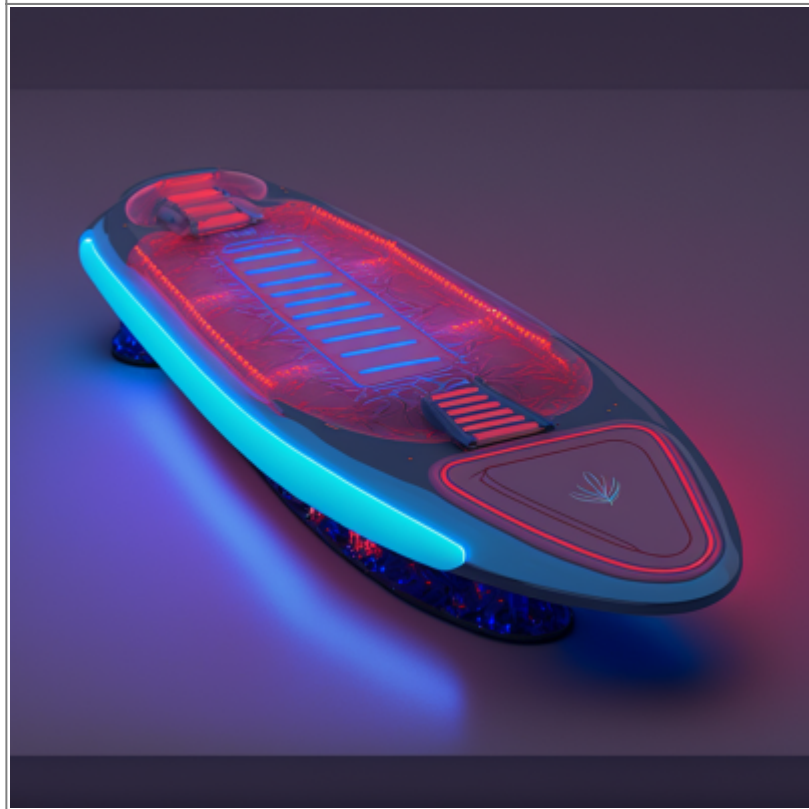

Design

The design appearance of the Hoverboard decals varies between owners in both coloring and the picture it might have. Those in the NDC might prefer red and black, as that's their nation's colors, while those in Nepleslia might prefer green. The list varies depending on the person or nation, and what they want.

Types of Design Text The Hoverboard Designs can be split into three specific types.

- Color
- Picture
- Special

Hoverboard

Colors

As part of its design, the metal of the board can be a variety of colors. It is also possible that the metal be left ordinary and the lighting effect is the only thing that has color added as well. While the board can have actual artwork added to it, there is a choice of no art too.

Katsuko's Board

[Katsuko](#)'s board is designed with the [Motoyoshi](#) Matriarch's colors in mind. Her board still follows the same appearance as the others though her board is uniquely hers.

Team Colors

Those a part of a professional team can have their team's colors be on the board if so desired.

Picture

Hoverboards are able to have artwork added to their boards as previously mentioned these were under the laminate to protect them from the pressures of environment. Some art includes,
