

Yugumo Standard Magazine

The Yu Standard Magazine is a secure storage facility developed by [Yugumo Corporation](#) for storing and maintaining a variety of ammunition for their starships. The magazine features heavily armored walls, independent environmental systems, and an automated feed system for easy access to ammunition during combat.

History

The Yu Standard Magazine was first developed for use aboard the [ISS Mitsu](#) in [YE 42](#). Due to its success, the design was later used throughout the [Yugumo Fleetworks](#) line.

Description

The Yu Standard Magazine is a heavily armored, static-free vault containing [Kinetic Penetrator Ammunition](#) for the ["Taihō" Scalable Mass Driver](#) and missiles for the ["Suzukaze" Mini-Missile Launchers Type 43](#), as well as any other ammunition for the ship's loadout. It is connected to an automated feed system for quick and easy access during combat.

The magazine is secured behind [Forcefield-Nested Isolation Doors](#) and access-controlled. Other than during resupply or repair, it is not necessary to enter the magazine.

OOC Notes

[Yuuki](#) created this article on 2022/09/10 15:03. It is derived from an [approved article](#).
