

# Xeneth Cannon

The Xeneth Cannon is a revolutionary step in Anti-Neutron technology by [Motoyoshi Fleet Yards](#) inspired by the [Subspace-Encased Anti-Neutron Turret](#) on the [Ascendancy-class Flagship](#) and technologies gained from the [Sfrarabla Mishhuvurthyar Xhrafuklurp \(SMX\)](#). The design is to make its debut as the main forward facing cannon on the [Ayana-Class Escort](#) in [YE 30](#).

Xeneth Cannon	
Designer	<a href="#">Motoyoshi Fleet Yards</a>
Nomenclature	My-D1-W3001
Manufacturer	<a href="#">Motoyoshi Fleet Yards</a>
Fielded by	<a href="#">Star Army of Yamatai</a> and <a href="#">United Outer Colonies Peacekeeping Forces</a>
Production	Discontinued Product
Damage Rating	<a href="#">Damage Rating (Version 3)</a> Tier 11 (Pulse) Tier 12 (Beam)
Price	Negotiated

## Legacy Product Information

[Motoyoshi Fleet Yards](#) was acquired by the [Yugumo Corporation](#) in [YE 41](#). These systems were deployed in vessels produced prior to that year and have been discontinued. Product Source is currently salvage and stockpiled stock and is no longer being produced. Please contact the [Yugumo Corporation](#) for more information.

Ships that used this system:

- [Ayana-Class Escort](#)
- [Eagle-Class Battle-carrier](#)

## About the Xeneth Cannon

The [Energy Conversion Method](#) is used to create Anti-Neutrons from the ship's primary power systems. Anti-neutrons are then stored in large internally shielded tanks located on the outer edges of the [Main Cannon Control Room](#).The Anti-neutrons are then encased in a subspace field similar to that utilized in [Subspace-Encased Positron Tunneling Cannons](#).

There are two discharge modes for the cannon:

### Pulse Mode

The pulse mode for the Xeneth Cannon:

- Purpose: Anti-Starship

- **Damage Rating (Version 3):** Tier 11. Shears through spatial distortion shielding.
- Range: 1 AU.
- Rate of Fire: 3 Pulses per second.
- Payload Subspace field generator has to recalibrate once every 10,000 pulses for 30 seconds. Effectively unlimited, so long as the ship provides power.

## Beam Mode

The beam mode for the Xeneth Cannon

- Purpose: Anti-Starship
- **Damage Rating (Version 3):** Tier 12. Shears through spatial distortion shielding.
- Range: 2 AU.
- Rate of Fire: 9 seconds of continual fire.
- Payload Subspace field generator has to recalibrate once every 80 shots for 30 seconds. Effectively unlimited, so long as the ship provides power.
