

Zen Armaments Precision Sniper Rifle

Overview

A fairly dangerous weapon, without being on the level of [Emrys'](#) sniper weapon. This weapon is far more rugged, making use of polymer furniture and other carbon ring bits. It's a conventional design, but a solid one. The scopes are the biggest problem, as they are not built in and therefore not protected by the gun's furniture. All reports show this to be a very accurate shooter, and in the long run cheaper to use than Emrys' weapon. That said, it lacks the range and killing power of other sniper weapons.

2500 KS each.
