

Unterfeldagens

Unlike the other ranks, the O5 - O8 ranks are specifically for solo or paired field agents. The lowest level of these is the unterfeldagens.

Unterfeldagens are sent out into areas where cells would be too exposed or draw too much attention. These are normally tasked with the gathering and initial analysis of intelligence for their assigned area. If discovered, they are only allowed to flee or commit suicide. This is because unterfeldagens are not allowed to kill, which can be quite a shock since the lower ranks of field agents in cells do have that capacity.

The next level of these specialized agents is [Feldagens](#).
