

Civilian Vehicle Armor

Armored designated for use by government and VIP vehicles in AF 260 (YE 31), the Civilian Vehicle Armor consists of a solid shell of woven carbon filaments with a layer of carbon nanotube mesh underneath. This enables civilian vehicles to resist high caliber personnel rounds and even low caliber armor rounds. It is also light weight compared to most armors and won't decrease fuel efficiency.

- Armor Type: Light (*0.6 Modifier*)
- SP for typical vehicle: 9 SP
