

# 10mm Infantry Laser Cannon

Much like the old Backenbrecher Infantry Laser, the newer 10mm Laser Cannon developed in AF 260 (YE 31) is meant to be a shoulder-mounted energy weapon for Powered Armor or a stationary energy weapon for bases. The 10mm Laser Cannon is an anti-armor/anti-personnel weapon meant to give the Abwehrens and greater punch than some of its other Powered Armor and Personnel weaponry, but has a shorter range than the 60mm Laser Turret.

Primary Role: Anti-Armor Secondary Role: Anti-Personnel Damage Rating Value: 1 ADR Range: 1 kilometer Rate of Fire: One pulse per second
