

Weâm Vana Movi (Farm)

The Weâm Vana Movi is the lower section of the [Sotâka Ruomâqi \(World Station\)](#). It is the largest source of produce on the station.

The heart of the farm is a large dome, this is where all product is received and distributed. It is also where seed storage is contained.

Each of the 'cylinders' of the farm has an internal surface of 132 square miles (341.878 km²) for planting. Down the center of each is a column that provides support equipment and housing for the farm workers.
