

Iasa Luqar (Pain Medicine)

This is a [drug](#) meant to reduce pain, used by the [Poku Saeruo Degonjo](#).

History

Iasa Luqar was developed by the [Otâmovi Wiy Jael \(Silver Moon Sect\)](#) for use by members of the [Poku Saeruo Degonjo](#) in 739 CY YE 21.

Overview

This pain relief medicine is a common addition to medical kits. It comes in two forms; pills, and an injectable liquid.

Pills

The pill form contains the same drug as the liquid, but it is in a slow release format and not as strong. It is commonly used to mediate low to medium levels of pain. It comes in prepackaged packs of 24. An adult dose is two pills, and bagli (children) should only take 1 unless under medical supervision. A dose will effectively reduce pain for about eight hours.

Liquid

The liquid form is for treating chronic pain, and must be administered by a medically trained person. Iasa luqar comes in prepackaged auto-injector ampules. One ampule is sufficient for a 100 kg patient. It takes approximately eight hours for the body to metabolize the drug.

Care must be taken in the use of Iasa luqar to avoid chemical addiction.
