

# Jyaon Ruo'sa Sa (Small Bridge)

This is an uncommon bridge used by the [Poku Saeruo Degonjo](#).

The bridge is square in layout. It has three manned stations, a [Uosme Wunyasa \(Life Station\)](#), and a [Ânamusme Wunyasa \(Damage Station\)](#). The ceiling is a parabolic curve which allows the Ta'a to hear anything said on the bridge, [Tyo'te Wuny'ta \(Fire Suppression\)](#) ports dot the ceiling. The floor is covered in [Loop-Pile](#) carpet, colored clan gray (charcoal gray). Hull braces composed of [Mâqirây \(Bound Metal\)](#) protrude from the walls.

The bridge is accessed through [Anomu Wunyte \(Security Door\)](#)s on either side of the bridge.

Each bridge station is a [Makoa Kâbo'ka \(Work Console\)](#) with a [Buvoli Kâbo'ka \(Work Chair\)](#).

## Overwatch

The center station is called the Overwatch. During normal operations this is where the Tin-Ta'a or Ta'a commands the ship. It also controls and monitors all communications systems.

## Pilot/Helm

This station is located on the starboard side of the bridge. It is where the senior pilot flies the ship during the primary shift. The station is mounted on a platform that allows it to rotate 180 degrees. This allows

the occupant to face straight forward, or to the rear.

## Sensor/Navigation

This station is located on the starboard side of the bridge. The person manning this is responsible for calculating wormhole paths, and plotting intra-system trajectories. The station is mounted on a platform that allows it to rotate 180 degrees. This allows the occupant to face straight forward, or to the rear.
