

# Vamâqi Bajao (Repair Berth)

The Vamâqi Bajao or Repair Berth is one of the [Mâhoai Âdor \(Sky Harbors\)](#) facilities. They are used for spacecraft that require repairs to the ship's systems and or structure.

The berth area is equipped with [Heim Force Generators](#) which are activated during transfers and repairs. The gravity in the berth is typically lowered to 0 - .5 g. It is taken to 0 if the craft has serious structural damage or requires work performed on the landing struts or other supporting members. Otherwise the gravity is raised to .5g to aid with moving large components.

A service [Mâhoa Kâuri \(Concourses\)](#) for use by the technicians connects the berth with the rest of the Sky Harbor.

There is a robotic boom that supplies, external power, [Norjopa Yoqa'te \(Machine Connecting\)](#) connection to the craft allowing it to shut down their primary systems.

## Enclosed Repair Berth

On planets with a hazardous or corrosive atmosphere, berths are designed to lower the platform into the ground after a vessel has been placed on it. The berth is then covered by panels made of [Mâqirây \(Bound Metal\)](#) and the atmosphere purged.

- *Return to [Mâhoai Âdor \(Sky Harbors\)](#).*
