

Tasba Sae (Star Song)

Tasba Sae is a new form of music created by members of the [Poku Saeruo Degonjo](#) they became available in [YE 34](#).

About Tasba Sae

Crews on the ships of the [clan](#) spend considerable time in space. So it was inevitable that someone would record the energy signals of a star with the ship sensors and then feed it into a [Yekloka Tasbate \(Singing Crystal\)](#). Different spacial bodies had different patterns which crew members enjoyed listening to. Originally these were played as 'mood' sounds for relaxing or meditating.

However, when [Niuta'a \(Musician\)](#) heard them, they realized the potential. Some [Niuta'a \(Musician\)](#) started taking various recordings and merged them into composite patterns producing a new form of music that is called Star Song. Each one contains typically no less than four stellar body signals, and the most impressive have twenty. A piece runs between 4 to 20 minutes. The music tends to have a hauntingly surreal quality.
