

# Qotim Anoka'ano Anomu'te (Ablative Armor Plating)

This defense technology has been used for generations by the *Poku Saeruo Degonjo* on their ships too small to support *HS-SS2-S720/00 Anoka Wotanu'pa (Defense Shield)*. Typically it is applied to Blades, Flitters, and older Searchers.

The Ablative Armor is applied in layers across the surface of the ship. It is composed of material that reacts to impact and energy damage. When hit the material vaporizes converting some of the destructive energy with it. Thus diverting a portion of the damage away from the hull of the vehicle.

## General

Class: Defense Nomenclature: HS-L2-A2400 Type: Armor Designers: *Otâmovi Wiy Jael (Silver Moon Sect)*  
Manufacturer: *Otâmovi Wiy Jael (Silver Moon Sect)* on *Poku Movi Vamâqi (Clan Void Berth)*

## Game Mechanics

The Ablative Armor Plating works just like shields, with one crucial difference. Unlike force fields the Ablative Armor does not regenerate. It must be replaced after battle by technicians.

Ablative Armor Plating provides protection comparable to Standard shields on the *Damage Rating (Version 3)* system. The exception is the threshold value can not be moved like shields.

Value	Modifier
Standard	0.6 x Base Structural Points
Spd Bonus	-0.05 c
