

Vakâme Âotunay (Double Bed)

Vakâme Âotunay (Two sleep within) is common both on [Poku Saeruo Degonjo](#) ships, and in living quarters on [Sotâka Ruomâqi \(World Station\)](#).

The bed is curved like all beds used by [Poku'vonai](#). The framing is made out of [Mâqitua \(Light Metal\)](#). It has an integrated vibration system to improve the rest of the occupants, it has individual controls for the pulsing. The interior is layered in three inches of visco-elastic foam for comfort, and covered in a thermo-reflective fabric.

Intended for a one or two occupants, it is used with four pillows, and a light blanket.

The bed is mounted with the head of the bed against a wall and beneath it are two integrated personal storage lockers. The lockers slide forward from under the bed for access. The lockers can be secured by a voice print or personal code, so that only the owner can open it. The locker has a capacitor system to allow the locking system to operate if power is lost.
