

Kujop'a Rotyka (Repulsion Cannon)

The is a defensive weapon that a [Poku Saeruo Degonjo](#) vessel can mount. It has been in use since before the [Norka \(The Exodus\)](#).

The weapon works by firing a series of anti-gravity pulses generated in a [Heim Force Generator](#) to repel objects. This has the effect of deflecting projectiles, or destroying them. It depends on the angle of attack between the target and the cannon. At more than 30 degrees projectiles without guidance and propulsion will be deflected away from the ship. Otherwise the pulses slam into the target causing damage.
