

Anoka Udano Kutaqme (Harmonic Gravity Drive)

The Anoka Udano Kutaqme is a powerful gravity engine developed by the [Poku Saeruo Degonjo](#).

About the Anoka Udano Kutaqme

The drive consists of three [Heim Force Generators](#) that are joined to each other. When, activated the generators are phased to create harmonics within the generated field. Using the field harmonics the drive creates, a more powerful motive force than the three engines working separately could.

Should one of the generators be damaged, the drive reverts to non-harmonic operation. The damaged generator can be reinserted into the phase by trained experts.

Capabilities

The Anoka Udano Kutaqme is capable of propelling craft trans-atmospherically, and it can achieve STL velocities.

- Max speed .2c (~59,958 kilometers per second) .2c (~37,256 miles per second)

Equipped Ships

This drive is currently only used on the [HS-AS3-7A Âdortin'sa Avuoten \(Thunder Shuttle\)](#).

Crew Requirement

The Anoka Udano Kutaqme require in-flight adjustments to compensate for interference from natural and artificial gravity sources. For this reason, craft with this drive must have a minimum crew of two. A pilot and a technician to keep the engine properly adjusted.
