

Ahmida Hallways

[Ahmida Civiltech](#)'s standard hallways are made up of plain two-tone paneled walls and flooring with fireproof insulation and coating. In case of a failure of the artificial gravity, the hallways deploy loops of a fire-retardant cloth to the center of the ceiling and walls to assist evacuation. The hallways themselves tend to have a fairly high and wide cross section due to the height and open-air design preferences of [Iromakuanhe](#).

Features

- Largely fireproof.
- Deployable maneuvering loops in case of artificial gravity failure.
