

HEMB (Heavy Enhanced Multi-Beam) Laser

Often found on more modern top-of-the-line vessels, the HEMB is the consummate point defense weapon of the Iromakuanhe military, often capable of dicing up an incoming offensive or missile screen with a shifting barrage of laser fire. It uses a larger array than the [LEMB Laser](#), and has vastly higher power requirements due to the demands placed on a system that used rapid compression field encasement.

Location: Ship Mounted Purpose: Point Defense Weapon Secondary: Anti-Vehicle, Navigational Protection
Damage: Tier 10, Light Anti-Starship

Range: 10 KM in Atmosphere, 300 000 KM in Space Rate of Fire: Can maintain up to 36 beams simultaneously. Muzzle Velocity: 1c
