

MCPA (Medium Charged Particle Accelerator) Cannon

The Medium Charged Particle Accelerator Cannon is a series of powered frame-scale particle cannons designed to offer an analogue to the soldier's battle rifle, with a modest rate of fire and decent output for its size. The MCPA is neither a rapid-firing saturation weapon like the [RCPA](#), nor does it have the singular striking power of the [ACPA](#), but instead relies on being able to make continuous accurate shots at medium range. Particles are taken in by a siphon that gathers particles, before feeding them into a [MASC-based](#) linear accelerator. Although other particle weapons are known for 'splashing' on impact this effect is less prominent in the MCPA's discharge.

Location: Vehicle-Mounted Purpose: Heavy Anti-Mecha, Anti-Vehicle Secondary: Anti-Shield Damage: T9, Electrical Damage

Range: 10 KM in Atmosphere, 45 000 KM in Space Rate of Fire: 60 RPM Area of Effect: .33 Meters Muzzle Velocity: .375c Ammunition 720 Particle Shots, Replenishes completely after 90 Minutes out of combat
