

# Yabeu - Garden of Heritage

Yabeu is an animal sanctuary started by [Ny'za Hasti](#) in [YE 35](#) with the purpose of protecting species native to [Lor](#).

## More about Yabeu

With the ecosystem rapidly changing on Lor after the 'Moon Fall' incident many of the animals of Lor had to be quickly moved to the [Nyli System](#) and the [Hici'emi System](#), but this was not without loss and many of the species' populations dropped as a result of this. Ny'za decided to start an animal sanctuary to try to preserve some of the species of Lor, and possibly other planets in the future.

Yabeu is a closed ecosystem on a roughly 40 square kilometer island on [Hici'emi IV](#). There is a small dock as well as runway on the island and near by is the central office where business facilities and customer services are handled.

## Habitats

On Yabeu there are several different natural habitats that the animals can live in. Though there are no borders between each of these habitats they are monitored individually and each have a facility where specialized staff can take care of problems there.

## Beach

The beach on the opposite side of the island from the docks and runway has beautiful white sand and occasional rock formations. With trees not too far away it serves as a perfect spot for many creatures that rely on bodies of salt water for different purposes.

## Cliffs

With a small mountain raising to 700m above sea level the island has rocky cliff faces that many birds and animals make their own. There are public trails leading around but the summit can not be reached by trails. With the exception of birds many of the animals that make this area their home tend to be herbivores that feed on the many roots herbs and berries that grow here.

## Jungle

Dense jungle with tall trees that act as shade. Taking up the majority of the island this is where most of the animals make their home. Because of its size and diversity of population there are two facilities in this area. Many paths have been made to navigate vehicles through for travel purposes.

## Lake

There is a large fresh water lake near the middle of the island that serves as a habitat for aquatic creatures. It serves as a watering hole as well and has a rather diverse culture not only below the surface but around and on top as well, hosting several different species.

## Species

There are many species kept at Yabeu but some of the notable ones include.

- [Gif'elm](#)
- Va'haar - What happens when a bear, a lynx, and a sabre-toothed tiger are smashed together. Big, surly predator that lives alone.
- Graada - A bear the size of a bison with the temperament of an elephant. Mostly herbivorous, but does eat some meat.

## Pet and Breeding Services

In [YE 37](#), after building up a significant population of certain species, Yabeu has begun to offer services more akin to a breeding center now as well. Customers can now buy pets from the sanctuary as well as purchasing breeding services if they would like their pets to have children. Of course not all animals in Yabeu will be available, only currently stable breeds will be allowed.

## Pet Breeds

The different breeds and species available to purchase as pets.

- [Gif'elm](#) - 300KS,
  - does not sell *Vanity Breeds*

## Breeding Services

Yabeu offer's breeding services for the majority of the animals they have present. They will even breed two animals belonging to customers if the customer is having trouble doing it on their own. The breded

animals can even stay in save zones in the Yabeu complex until the birthing so that they do not have to leave their mate, this of course cost extra and is only if there is vacancy.

Animals Yabeu breeds

- [Gif'elm](#): 100KS / 70KS extra per animal staying
  - Will ask to keep at least one of the young if more than 2 kits are born and the mother stayed at Yabeu and either of the parents belong to Yabeu.
  - Will not breed to make *Vanity Breeds*.

## Veterinary Services

Many of the staff in Yabeu are registered veterinarians, so that they can handle any medical issues. As such Yabeu has begun to offer veterinary services at a low cost to those who need it.

## Security

Yabeu relies on several [EM-O1 "Tadayou" Series Drones](#) for surveillance purposes as satellite imagery and uses [EM-J5-6a - FARS GP](#) in automated patrols.

## OOC Notes

Players are welcome to create animals and ask [Syaoran](#) if they can be put in the preserve, as long as the animal gets approved.
