

LSDF Primary Baths

Serving as the main bathing solution in installations and starships for a majority of a crew, the Primary Baths of the LSDF consist of group baths which rapidly recycle and process the liquid present to maintain optimal temperature and cleaning efficiency of the water used for the bath. Aside from the large tub present in this facility, a number of shower stalls are available. Along with the bathing facilities, a disposable towel dispenser, an air-jet drying system for faster drying, and a counter on which users can set out grooming supplies has been included.
