

LSDF Small Launch Bay

Small launch bays are designed to handle low-volumes of vehicle launches. Focusing mainly on the launching of singular fighters or small groups of power armor, the small launch bay can only handle one or two fighters or shuttles along with a dozen power armor units on the actual launch deck. Small launch bays can also be serviced by vehicle lifts. As with most Lorath launch bays, these launch bays include forcefields, bay doors, vehicle lifting arms, and interior defenses.
