

LSDF Children's Recreational Facilities

Designed to provide entertainment for children aboard stations and installations, children's recreational facilities are designed to be built to scale to provide easy access for children to use the entertainment facilities available in such compartments. Children's recreational facilities focus upon methods of entertainment which are safe, and possibly educational. Furthermore, children's recreational facilities may sometimes be built upon a theme such as those provided by [Shiro Model Industries, Inc.](#)

Children's recreational facilities can include the following;

- 2D and 3D entertainment viewing monitors.
- Simulated motion rides.
- Mock 'combat' games.
- Play areas with [Pico-Jelly](#) softened floors.
- Toys, clearly.
- And more, depending on child population and themes.
