

LSDF Stellar Studies Lab

Designed to serve as a workspace to conduct navigational studies, examine data regarding stellar bodies, and to conduct visual review of astronomical phenomena, the stellar studies lab has been designed to facilitate such activities.

General Information

Designed with simplicity in mind, the stellar studies lab incorporates modern technology to utilize what would normally be no more than a walk-in closet sized space, to produce the illusion of a full-on planetarium, with interactive features for data retrieval, study, and manipulation.

Equipment

To produce the functions of the stellar studies lab, the lab has been equipped with the following systems.

- Volumetric projectors
- [Neural interface compatible systems](#)
- Precision forcefield projectors for simulating surfaces
- Two padded chairs with computer interfaces
- Independent read-only access to the navigational system of a starship if the lab has been installed upon one
