

# Movable Frame Technology (MF)

The Movable Frame (sometimes known as the Maverick Frame) is a breakthrough Power-Armor technology that is durable, capable and very adaptable. It infact consists of a number of sub-technologies which were developed as part of the Winter Defense Project.

Those technologies are as follows:

## Structural Layering System

- [Armored Mesh](#)
- [Mounting Mesh](#)
- [Isolation Mesh](#)

## Endoskeletal chassis Interface Hive
