

NMX Type 33 Camouflage Cloak

The NMX Type 33 Camouflage Cloak was introduced in [YE 33](#) alongside the [NMX Type 33 Camouflage Smock](#) for use in the jungles of [HX-13](#) and similar places. It functions as a raincoat.

The cloak is a fairly simple, thigh-length hooded design made of a soft, moisture wicking fabric that pushes excess moisture from the interior to the exterior surfaces of the coat. Water beads on the outside and will not soak in. The cloak is held by a single clasp near the neck. The cloak is available in the NMX jungle pattern (shown at right).
