

# NMX "Immolator" Strategic Bomber

The "Immolator" is a long-range aerospace [bomber](#) craft used by the [NMX](#) beginning in [YE 33](#). It has starship-grade shields making it immune to most fighter and armor weapons.

## Key Features

- Operates well in space and in the atmosphere and capable of planetary landings
- Weapons:
  - Eight twin anti-armor plasma turrets Tier 9
  - Bomb bay holds 10 incendiary bombs
  - Carries up to 8 Tiers 13 through 15, Light Anti-Capital Ship through Heavy Anti-Capital Ship aether torpedoes externally
- Optional underside carrier attachment allows transportation of a [Flayer Tankette](#) (in this case, the Flayer's anti-gravity systems act as the bomber's landing gear). 
- Thrust-vectoring aether plasma engine
- Hyperspace Fold Drive
- Combined Field System
- Anti-gravity System
- Sophisticated sensor system
  - Thermal
  - Gravitic
  - Aether sensors
  - Ultra-wide band time-modulated radar
- Retractable wheeled landing gear

As shown above, behind one of these is a bad place to be (note the concentration of anti-fighter turrets).

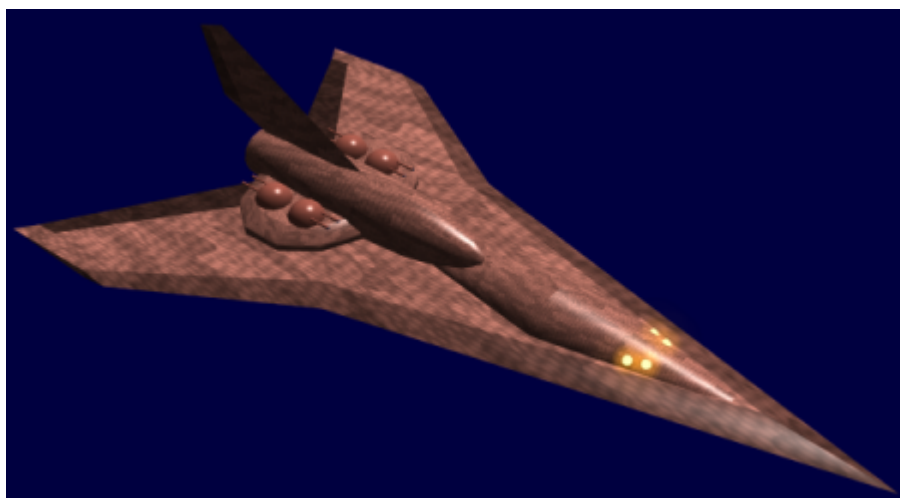

## Dimensions

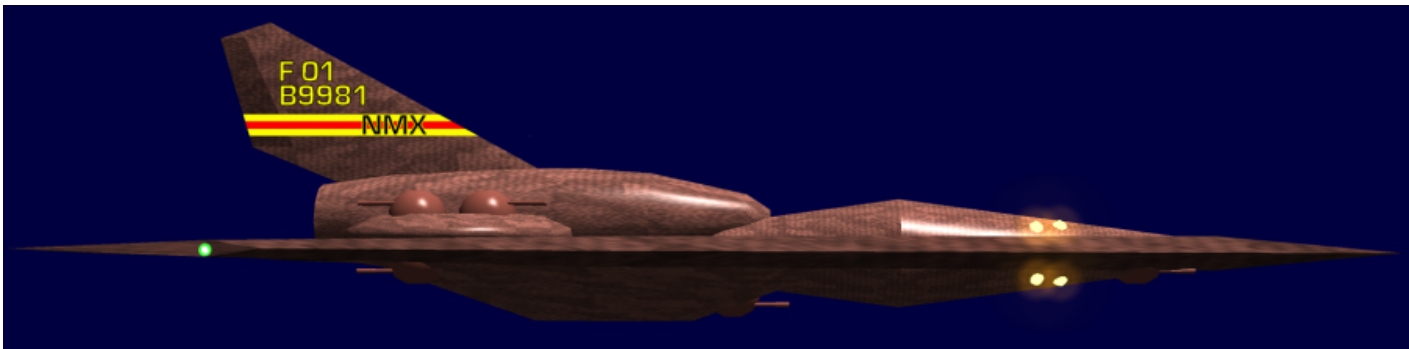

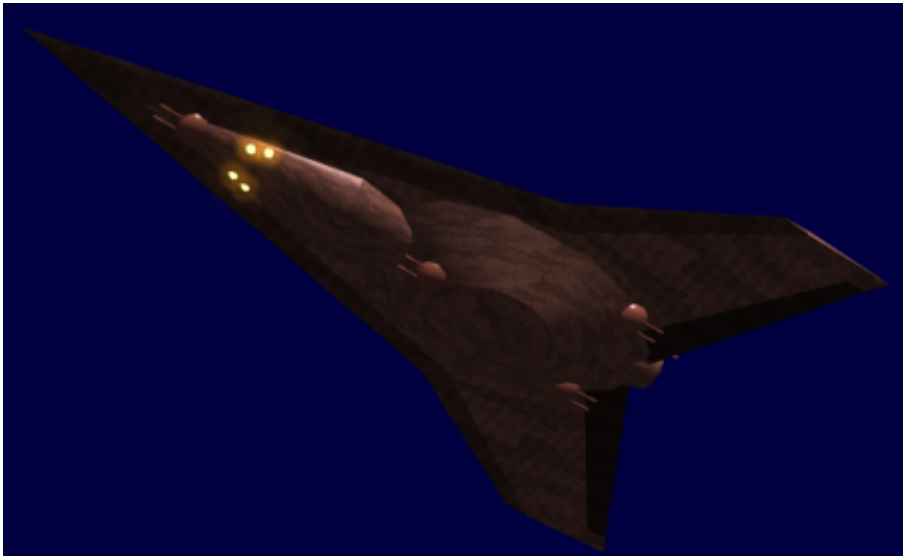

- Length: 28.5 meters
- Wingspan: 12.75 meters

## Damage Capacity

See [Damage Rating \(Version 3\)](#) for an explanation of the damage system.

- Hull: 6 SP (starship scale)
- Shields: 10 SP (starship scale) - Threshold Tier 9, Heavy Anti-Mecha
