

New Dusk Conclave Nomenclature System

Having never worked in, or around conventional markets in the beginning, [Section 6](#) developed their own nomenclature system. It was developed to be simple and fit their cataloging needs when it came to the fruits of their research and development projects. This continued even after becoming the [New Dusk Conclave](#), now even by the companies that call the young nation home.

Manufacturers

- S6 - [Section 6^{1\)}](#)
- BW - [Black Wing Enterprises](#)
- NH - [Noval Heavy Industries](#)
- MG - [Mining Guild](#)

Item Types

The item type listed in NDC nomenclature, is generally a form of short hand version, of what the item in question has been classified as. For instance, a Main Battle Tank, despite it's style of construction, will be listed as MBT as the item type in its nomenclature. Like wise, in the case of light star craft such as the [BW-MSF "Sparrow" Modular Fighter](#), a Modular Star Fighter. It is listed as a MSF in its nomenclature.

The only deviation of this, is components, which all fit standard classes of components. Shields are labeled as SLD, and engines as ENG, as well as other common types of components used in the construction of [New Dusk Conclave](#) products.

Examples

- MBT - Main Battle Tank
- HBT - Heavy Battle Tank
- LBT - Light Battle Tank
- MSF - Modular Star Fighter
- MWS - Modular Weapon System
- F - Frame
- VF - Variable Frame
- FA - Frame Arms
- P - Pistol

Components

- SLD - Shield modules

- ENG - Engine modules
- SNR - Sensor modules
- AMR - Armor modules
- UTL - Utility modules
- CMP - Compartment²⁾ modules
- DRN - Sub-component drone or drone module
