

NDC Survival Bug Out Bag and Cache

This page details the survival kits that are used by the [New Dusk Conclave](#) in [YE 43](#).

History

The [New Dusk Conclave](#)'s version of the survival kits was created as a result of a discussion amongst members of the [Department of Medical Services](#) staff about what might the civilians and the troops of the Military need to survive on an unknown hostile world. The discussion came to a head during the early days of [YE 43](#) after putting everything together and then concluded when they finally agreed on what needed to be there.

They chose to separate things into something someone could carry, and something that could be reasonable for a Starship.
