

MAKO 80mm Rods

In [YE 41](#), the [Department Of Engineering](#) designed a round to be fired from the [Mass Accelerated Kinetic Ordinance "MAKO"](#). This was done as part of the development behind the arsenal that would be loaded onto the [BW-MBT-1A "Centaur"](#), the new premier main battle tank of the [New Dusk Conclave's NDC Ground Forces "Duskerian Legion"](#). Each round is sold at [20DS](#) per round, and 2,000DS for a small crate of 100 rounds.

Stats
