

# Neshaten Gladiatorial Arena

The Gladiatorial Arena is a very large room measuring between thirty six (36) to one hundred and nine (109) meters long depending on the size of the ship or station that it is placed on and is found on most large [Neshaten](#) vessels or stations. Some arena's can be almost three hundred meters long, but these are very rare and usually only found on stations and in cities.

The room has a high ceiling with thick lighting to help illuminate the room during special sporting events. The floor is a combination of carpet, where people usually walk; and hay or soft dirt, where animals are typically. The walls are a layered metallic-laminated wood, with etched in pictures depicting Neshaten sports history along with famous winners.

This particular arena is used almost entirely for large scale sports such as racing events, but can also be used for holding special events such as balls or celebrations. This is the only ship or station based area that will allow for Vere'tana'me Races, but these races can only be done with the permission of a vessel or stations commanding officer.

Along with the races and the special events, the arena is also designed to allow for massive holographic events thanks to holographic emitters built into the floor, walls, and ceiling.

In the event of an emergency, the gladiatorial arena can be used as a makeshift repair base or a refugee center. This room is only connected to a ships [recreational room](#). It never stands alone, and can be attached to multiple recreational arena's depending on ship or station.
