

Kingdom of Neshaten Locations

The following details some of the influence within the Kingdom for colonies and provisional governments.

Colonies

Colonies make up the majority of the Kingdom's sphere of influence within the Kuirenasova Cluster, each and every colony is selected to perform a specific task whether it is industrial, agriculture, military, or population - these tasks are determined based off the planet that the colony is placed on, whereas a planet that has very little fertile land might be better suited to industry or military operations, a planet that does have a lot of fertile lands would be used as a population center or one for agriculture.

Every star system though has a military colony in it which serves as a response base in the event of attacks either by foreign nations or pirates.

Nesha System	Home System	None	ER 000	Nesha Prime (Planet) , Levia (Planet)

Provisional Governments

Every planet has a provisional government on it, run by a Lord or Lady, who is a member of a noble family. These governments are responsible only for local government functions and are not capable of taking national actions such as mobilizing the main navy for military actions. Provisional Government is created by local citizens, who then elect a member of a noble family to oversee the government - like the Council Monarch, even the provisional governments have citizen oversight committees. Small militia groups operate under these types of governments who are responsible for protecting the colonies from external attacks by pirates or other foreign forces until help from the Navy can be arranged.
