

Ge'kina Class Passenger Liner

A passenger transport that was designed nearly two hundred years before the [Neshaten](#) regained faster-than-light travel. The ship is designed to ferry passengers from planet to planet. It was made available in ER 777.

About the Ge'kina

The Ge'kina is a replacement to an older, more obsolete, passenger liner that was designed in ER 387. It can ferry passengers to either an orbiting station, a starship that has the ability to dock ships of this size, or ferry passengers to another planet entirely. The ship has weapons, but they are intended purely as defense.

History

The Ge'kina was designed in ER 720 to replace an older, aging passenger liner that didn't have FTL capability but also lacked weaponry, due to a small rise in piracy and the worries that another foreign race - if one was ever discovered - could prey on civilian ships.

Designed from the ground up to handle the heat of re-entry, the ship's hull was also dual designed to withstand the punishing effects of Nesha Prime treacherous weather.

Appearance

The Ge'kine has a slopped arrowhead like shape, with the rear section housing the ships four large engines, and its front section housing the bridge. The entire center section holds the crew and passenger compartments along with recreational and observation rooms.

Passenger loading is from the front of the ship, where a passenger walkway extends to give people access to the ship and then toward the passenger seating and cabins, but also, access to the cargo hold which is also located along the ships belly.

There are hardware points on the ship's hull to allow turrets to be connected, two located on top, two beneath.

Statistical Data

General

Class: Passenger Linger Nomenclature: Ne-Y1-1a Type: Civilian Ship Designers: Neshaten Dockyards Manufacturer: Neshaten Dockyards Fielded by: [Kingdom of Neshaten](#) Organizations using: [Kingdom of Neshaten](#) Production: Varies Price: Check Below.

Crew and Accommodations

Crew: 28 Passenger Capacity: 95 Emergency Capacity: In the event of an emergency, the ship can carry almost two hundred people on board.

Dimensions

Length: 192 meters (629.9 feet) Width: 100 meters (328.1 feet) Height: 50 meters (164 feet) Decks: 4 (4 meters each)

Propulsion and Range

Speed

- Sublight Engines: .150c
- Atmospheric Engines: 450 km/h
- [Hyperspace Drive](#): 244,928c
- *Note: The Ge'kina is intended for atmospheric flight.*

Durability and Maintenance

Service Lifespan: 10 Years

Lifespan: 20 years with continued refits and maintenance

Refit Cycle: Once every four years, or when new and improved technology comes out to replace current tech onboard the ship.

Damage Capacity

See [Damage Rating \(Version 3\)](#) for an explanation of the damage system.

Hull: 10 Shields: 10

Inside the Ge'kina

Compartment Layout

Bridge

Located in the forest section, the bridge is of medium size, capable of having eight people. Two pilots,

two co-pilots, captain, gunner (if turrets are on board) sensor specialist.

Cargo hold

Located along the ships underside is a large cargohold for storing passenger luggage or other items for transport.

Armory

There is an armory located behind a fake bookcase in the crew lounge; from here crew can access weapons to be used in the event of boarding.

Crew Cabins

Crew Cabins are located toward the forward section of the ship just below the bridge, and another set is located toward the rear of the ship.

Crew Lounge

The ship's crew lounge is located just behind the bridge, while another located on the aft section just in front of the crew cabins. The lounge is used by the crew for recreational. The lounge is split in two, with a corridor passing down the center leading through the ship; there are windows to allow the crew to see out.

Cafeteria

The ship has a cafeteria used by both the crew and passengers, located in the center of the ship between the two passenger compartments. Has seating for forty people.

Passenger Cabins

Passenger Cabins are located in the entire central forward and aft sections, each cabin is designed to hold between one to five people depending on setup. The cabins have a bathroom, small living room, and a bedroom.

Passenger Seating Area

Passenger seating is located along the outside of the passenger cabins, located near the wings of the liner and up to near the observation lounge.

Mainframe

The ships mainframe is located under the rear section of the bridge, accessed only by a keypad.

Engineering Room

Toward the rear of the passenger's liner is a medium sized engineering room, with enough space for five people person. The engineering room takes up three decks.

Ship Systems

Weapons Systems

The Ge'kina is equipped with a limited number of weapons for protection against raiders or pirates.

Computer and Sensor Systems

Located toward the rear of the ship is it's computer control systems and the censor array, it uses a quantum computer that houses the ships ECM systems.

Life Support Systems

Located toward the center, the liners life support systems are designed to provide oxygen for approximately three hundred individuals, the filtering system can keep on filtering and cleaning the air for a course of ten years of the need ever arises.

Reactor System

The ship utilizes a medium sized [Lunebaren Reactors](#) as its power plant, located toward the rear of the ship. For backup power, there is a small singled sized reactor located behind the main reactor.

Propulsion

The ship uses four [Crena Energy Engine](#), that are situated in the back, two one either side of the ship.

Weapon Compliment

The ship can be equipped with the following weapons.

- 4x [Mark 1 'Rok'truvance' Anti-fighter Turrets](#) or 4x [Streamer Laser Turrets](#)

Vehicle Compliment

Can carry a number of vehicles thanks to its expansive vehicle bay, however, what it carries is up to the ships captain or if it's attached to any military fleets.

Buy or Lease

The Ge'kina can either be unarmed or armed. Anyone is allowed to be an unarmed Ge'kina, but armed Ge'kina are not allowed to be owned by anyone but the military and Royal Family.

An Unarmed Ge'kina costs: 7000 Rn An Armed Ge'kina can be leased for: 3200 Rn every season

If a citizen buys an unarmed Ge'kina, but then decides to add weapons down the line, they must buy a weaponized license from the government. This license ensures that they have the authority of the government to arm their vessel, however, armed vessels that are 'not' leased from the government are placed under much more strict control and are subject to vessel searches at every port they land on, to ensure that the ship is operating as the law states.
