

Neshaten WIP & Wanted

This is the workbench for the development of articles in the [Kingdom of Neshaten](#).

The Pages

The pages of Neshaten need some love, edits, and better linking. The idea is to get WIP pages from Nesh approved, updated, and in a better format so the Faction Manager got it checked and approved by the [NTSE](#).

When looking at the articles, keep in mind when editing them:

- **Isolated:** We are still at a state of isolation, though we are slowly coming out of this with diplomatic talks with [Democratic Imperium of Nepleslia](#).
- **Crystals:** Nesh tech is based on powered crystals, we do not use Aether. [Lunebaren Crystals](#) for ref.
- **Connected:** When adding new tech or culture stuff, please connect them to the other articles.
- **FIFO:** First in First Out principle, simply put...lets focus on what we got and get that fixed first. If we really need new stuff, give a good reason for it.
- **Categorize:** Have Ranks fall under :ranks: have equipment fall under :equipment: and so on.

Things to fix

- Repair the errors on articles
- Update format on articles
- Relocate articles to the proper namespace
- Reconnect articles with each other
- Make a starter page
- Check articles for any red links, incompletions or incorrect information.

Namespace List

- :ranks: for ranks
 - all ranks have been transferred to correct name space [V]
