KS Card Reader

The KS Card Reader is used to allow a user to access financial systems with their KS Card. The user simply places the card on the reader, and the reader interrogates the card.

The Card Reader is connected to the PANTHEON by secure encrypted connection. Depending on the size of the transaction the level of user identification required increases.

Identification can take the form of:

- Keypad PIN
- Biometric retina, voice print or thumbprint
- Psionic Signal Control

Installation and Maintenance

The KS Card Reader can only be installed by National Bank of Yamatai certified technicians, and require regular encryption updates.
