

Cassefin Reservoir Drinks

A healthy mind is a productive, fertile and delicious mind! - Cassefin Montreal

Overview

The Cassefin Reservoir line of health drink was conceived by none other than [Cassefin Montreal](#) herself, out of concern for the horrible standards of beverages she experienced in and around [Nepleslian](#) culture. Not wanting her [BioNutri-Snack](#) foods to be left alone in terms of suitable liquids to consume with them, [Cassefin](#) concocted a number of beverages which are produced on the [Nepleslian Arms and Munitions "Cirrus" Class Research Station](#), with most of the liquid elements derived from the Bio-Organics and Chemical Productions facilities on the station itself.

The machine itself is pretty common in terms of design...a large panel takes up the right area of the machine, with a money card slot and buttons with small descriptions of the flavors of each beverage. Dead center of the front, however, is a full-body shot of [Cassefin Montreal](#) in her [Nepleslian Arms and Munitions "Cirrus" Class Research Station](#) lab uniform, holding a bottle of Citrusensation in one hand and giving the patron a thumbs-up with the other hand, accompanied an overacted wink and canary-eating grin.

There have been no associated deaths linked with Cassefin Reservoir beverages to this date (although with his continued streak of horrible luck, [Akio Noboru](#) may be hurtling towards being the first).
