

Item Sets

It's useful to group items into sets as well as by category. An item set page is basically a list of items that go together, for example you wanted to list a set of standard issue gear for a faction, or the list of items in a kit.

Here's some examples of things you can use item sets for:

- Menus
- Equipment Loadouts

This section is quite new, so there's not a lot of sets listed yet. Why not create one?

List of Item Sets

This list is automatically generated using all pages in the items:sets: [namespace](#).
