

Akina System

Akina is a [star system](#) in the [Yamatai Star Empire](#). It is located in grid [1913](#) of the [Kikyo Sector](#) and is considered part of the [Bard Cluster](#). In [YE 44](#), it became the home of [Tsenlan](#), the nation of the [Norian](#) people within the [Yamatai Star Empire](#).

The system was named Akina, by [Ketsurui-Motoyoshi Katsuko](#) after her wife [Shimizu-Motoyoshi Akina](#) ([清水本吉明菜](#)).

History and Background

Akina was originally colonized under the control of the [Fifth Expeditionary Fleet](#) and protection until [YE 29](#) when the [Mishhuvurthyar](#) conquered the [Bard Cluster](#). It was then under the control of the [Mishhuvurthyar](#) until their defeat in [YE 30](#), when Akina was released to the [Yamatai Star Empire](#)'s control as part of the [Intergalactic Armistice Agreement of YE 30 \(IAA\)](#) signed at the [International Relations Conference of YE 30](#).

After the [Mishhuvurthyar](#) were driven off the system was once again under the control of the [Yamatai](#)

Star Empire . The system was under the control of the **Fourth Fleet**, and it was re-colonized primarily by former **Yamatai Star Empire** soldiers. There are many sites visible from orbit where the **Mishhuvurthyar** were conducting massive strip mining, they are slowly being reclaimed by the environment.

In **YE 32**, the City of Taisho was expanded by an influx of colonists from the outer planets of the **Bard Cluster**. The **Fourth Fleet** cannibalizing material and equipment from their damaged ships they created a fort on the planet and stationed soldiers on the planet. The **Fourth Fleet** assisted the planet's colonists to develop Militias, they equipped them with obsolete/surplus equipment. There was a **Frontier Starport** established by the fleet for civilian and military traffic.

In **YE 33**, the **Fourth Fleet** installed a **4SF Standard "Guriddo" System Deployment** to protect the planet from space. There is a **Frontier Fort** on the planet to defend the surface.

In **YE 44**, with the **Arrival of the Norians** in the **Kikyo Sector**, the refugee towns on Akina III were reopened to accommodate the people of **Tsenlan**. At the same time, the planet was also selected to become their permanent home and plans for cities like Asarthotar began to take shape. **Tetsuya Eitan (Airwin Caeyara)** was selected to become the system's Senator to represent the system on the **Senate of Yamatai**.

In **YE 45.8** **Cheol Eitan** became the Aestaesys of **Tsenlan**, and won the election for the **Senate of Yamatai** seat for the **Akina System**.²⁾

Akina System

Information on the Akina System is transmitted by a **Yomawari-Class NavComm Buoy** placed in **YE 44** as follows:

Presence of the Star Army

The Akina System is patrolled by the [Fourth Fleet](#) of the  [Star Army of Yamatai](#). In [YE 33](#) a [4SF Standard "Guriddo" System Deployment](#) was deployed to assist in the defense of the system.

Star

A glistening ball of incandescent gas in the dark night of space.

Akina I

Akina I is a rocky  [terrestrial planet](#) with a dense toxic atmosphere with  [sulfuric acid](#) clouds that are undergoing a constant  [greenhouse effect](#). Geological surveys conducted by [Fifth Expeditionary Fleet](#) when the system was first explored in [YE 28](#) determined the world would be ideal for an automated mining, and possibly dome-covered colony constructions. No development has been done to date, but in [YE 44](#), the  [Lo'ken Institute](#). has several mining facilities planned.

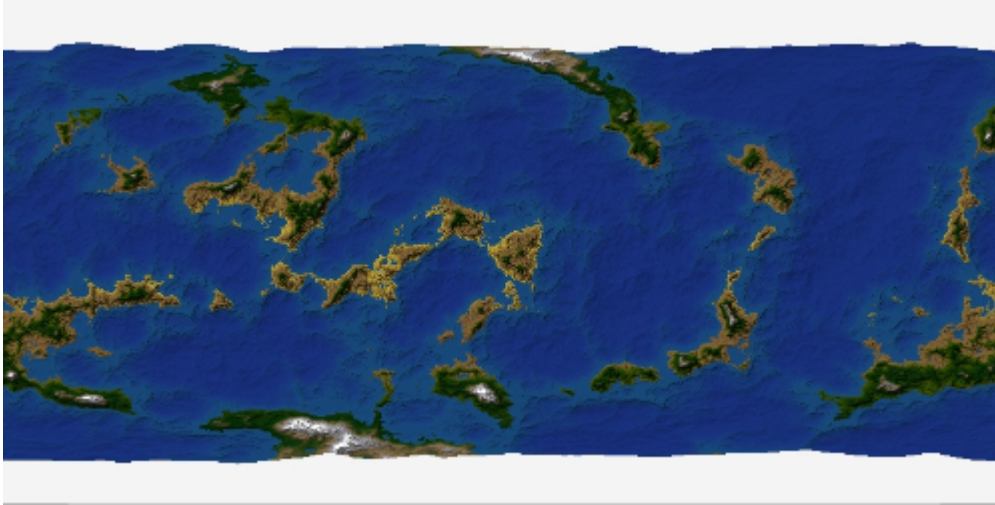

Akina II

Akina II is another rocky  [terrestrial planet](#), it has a thin unbreathable atmosphere of mostly  [carbon dioxide](#). Similar to Akina I, it was surveyed by the [Fifth Expeditionary Fleet](#) when the system was first discovered in [YE 28](#). The surveys determined the world would be idea for mining as well as possible terraforming. As of [YE 44](#), the  [Lo'ken Institute](#). has several mining facilities and other projects planned.

Akina

The planet Akina, or Akina III, is the jewel of this system. It is a [Yamatai-Like Planet](#) with a number of different biomes. This planet's atmosphere is nitrogen, oxygen, and trace elements. The polar regions are ice covered, which covers approximately twenty-five percent of the surface. Oceans cover seventy-nine percent of the surface. Land masses account for twenty-one percent of the surface, there are a number of landmasses and numerous chains of islands. Plant life is abundant. Oceans support a variety of marine life forms. A variety of simple animals are present on the land masses. The planet's relatively cool climate made it a perfect choice for the settlement of the [Tsenlan Norians](#) following the [Arrival of the](#)

[Norians](#) to the [Kikyo Sector](#) in [YE 44](#).

Fort Akina

Fort Akina is a [Frontier Fort](#) operated by the  [Star Army of Yamatai](#). It was established in [YE 32](#).

City of Taisho

Taisho ³⁾ is located wedged up against a mountain on the temperate peninsular-offshoot of Akina's southern polar continent. It is named after the then-rank of [Shimizu-Motoyoshi Akina](#) (清水本吉明菜), the [Nekovalkyrja](#) whom the planet is named after. Just to the west, barely outside of city limits and already bordering a lot of new development areas is Akina Starport. On the other side of the mountain is Fort Akina. Because of its unique position on the planet, storms blowing in from the north and the east frequently get “stuck” on the mountain and the nearby range, making Taisho one of the rainiest settlements on the planet.

Development Zone

The planet has a fairly large development zone outside of the City of Taisho. In response to the food shortage caused by the [Battle of Yamatai](#), the government opened a large number of farms here in [YE 34](#). [Equilibrium Foods](#) also established its first set of farms and ranches on the planet. There they raise, grow and sell a wide variety of food items, with a large portion of what they produce being donated to needy communities.

City of Asarthotar

Asarthotar ⁴⁾ is a city planned by [Tsenlan](#) to become the capital of [Tsenlan](#)'s state within the [Yamatai Star Empire](#). It is to be located on the eastern side of the mountain in which Taisho has been constructed

and will be constructed using [Sanctuary Technology](#). Construction is set to begin in early [YE 45](#).

Refugee Towns

In [YE 34](#) the [Yamatai Star Empire](#) constructed 10,000 [Refugee Towns](#), capable of supporting 184 million people with additional overflow capability in the form of tent cities if necessary. This was done to ensure the welfare of displaced persons from the former Yamataian colonies in the [United Outer Colonies](#). By [YE 38](#) the camps' residents had all moved on to real housing in Taisho or to other planets, and the camps were closed.

In [YE 44](#), after the [Arrival of the Norians](#), these refugee towns were reopened for use by the [norians](#) of [Tsenlan](#) to use until Asarthortar could be constructed.

SMX Strip Mining Operations

The planet is dotted with abandoned [Mishhuvurthyar](#) strip mining operations that have since been reclaimed by nature. These are a remnant of their occupation of the system in [YE 29](#).

The Moons

The moons of Akina are Eiko ⁵⁾ and Hiroyuki⁶⁾. The  [Lo'ken Institute](#) has a future colony project planned on Hiroyuki.

Business

The following corporations operate in this system:

-  [Lo'ken Institute](#) - Is just beginning operations in the Akina System.
- [Trinary Star Shipping](#) - Has been established since [YE 32](#) with several locations in the City of Taisho.
- [Bravemart](#) - Has been established here since [YE 36](#) with several locations in the city of Taisho.

People

The population of the Akina System consists of 200 Million [Yamataians](#), 330 Million [Norians](#) and, 200,000 [Lorath](#). The totals for the Norians reflect the population expected once the refugee crisis is over. The [Lorath](#) present in this world are not connected to the [Lorath Matriarchy](#), they were part of the [Arrival of the Norians](#) in [YE 44](#) and have been part of [Tsenlan](#) since they were encountered in another universe in [YE 42](#).

Akina is a relatively peaceful and hospitable place with these populations living in cooperation.

Characters

The [Characters](#) that are located here:⁷⁾

| Page | Occupation | Gender | Species |

| Aekara Tenui | Leviathan Technology Scientist | Female | Norian |
| Cheol Eitan | Former Fleet Admiral | Male | Norian |
| Keiko Tanaka | Nano Technology Research and Development | Female | Norian |
| Kytas Drenai | Head of Security | Female | Norian |

Transportation

Akina is connected to the rest of the [Yamatai Star Empire](#) as part of [PAINT](#) with regular flights in and out of Akina Spaceport and Fort Akina.

RP Opportunities

Some roleplaying opportunities on Akina:

- Visit the planet, and go on a camping trip in Akina's vast wilderness.
- Join the building of the new [Tsenlan](#) settlements on this world.
- Experience [Norian](#) culture and make new friends.

Rumors

Rumors they might be true, they might not.

- The [Motoyoshi Clan](#) and [Shimizu Clan](#) have a hidden retreat outside the City of Taisho.
