

Ayumi Nebula

The Ayumi Nebula forms the galactic southern border of the [Motoyoshi Colonial Sector](#).

The Ayumi Nebula is in space that is considered the territory of the [Yamatai Star Empire](#). It forms the border with the unclaimed territory to the galactic south and east.

History and Background

The Ayumi Nebula was first discovered by the [YSS Yugumo](#), of the [Fifth Expeditionary Fleet](#) in [YE 29](#). The nebula is one of the largest in the [Kikyo Sector](#), it stretches across more than fifty lightyears from [HX-17](#) past the [Tange System](#). The nebula is a region of intense electromagnetic and [scalar](#) interference generated by a [stellar nursery](#) located in the dense region to the galactic south of the [Asura System](#).

The nebula is a navigational and operational nightmare for ships, there are intense gravitational eddies and unstable patches. It is further complicated by pockets of concentrated hydrogen and other gases. The nebula gases are primarily helium, hydrogen that forms clumps with dust and debris; the density increases the closer to the [stellar nursery](#). A natural passage, Misato's passage stretches from the [Tange System](#) to the [Miyamae System](#).

During the [Second Mishhuvurthyar War](#) from [YE 31](#) to [YE 34](#), [NMX](#) forces often used the nebula to screen their presence from the [United Outer Colonies Peacekeeping Forces](#) and [Star Army of Yamatai](#) forces that patrolled the region.

When the [Tange System](#) was liberated at the end of [YE 42](#), remnants of the [Kuvexian Military](#) fled into the nebula when the [First Expeditionary Fleet](#) cleared the system.¹⁾

In [YE 43](#), the [ISS Asagiri](#) destroyed a [pirate](#) ship, the freighter "Wampoo", in Misato's passage.²⁾

Description

The Ayumi nebula is a massive cloud of interstellar gases and dust.

Transportation

The only way to travel to the Ayumi Nebula is by starship or other craft.

People

The [Bothuturtha Pirates](#) have been spotted operating in the fringes of the Ayumi Nebula since early [YE 43](#).
